Provider: C.H.I. Overhead Doors

Provider #: 40107783

Course Title: Exploring Rolling Doors & Commercial Sectional Doors: Understanding the Operation, Installation, Safety Features & Design Options

AIA Course #: CHIAIA003RDSCS

Length: 1 hour

Credit Designation: 1 AIA LU|HSW Hour

Description

In this one hour live course design professionals will be informed about the inherent traits of rolling steel doors and commercial sectional doors. Participants in this course will gain an understanding about the Operation, Installation, Safety & Design Options available for commercial rolling and commercial sectional garage doors which will help determine the best door type to utilize for a particular application.

Learning Objectives

By completing this course the design professional will be able to:

1. Participants will gain an understanding of how rolling doors and commercial sectional doors operate and function as part of a building.
2. Participants will be made aware of the installation criteria requirements for various operation types for rolling and commercial sectional doors, as it relates to sideroom, backroom and headroom.
3. Participants will be able to identify optional safety features available for commercial sectional and rolling doors to and how to integrate these features into a door specification.
4. Review the common design options for rolling & sectional doors including security, durability, windload, aesthetics and special applications. Participants will gain an understanding how these options can influence and enhance a project's design.

Method of Delivery

The course is offered to design professionals in a lunch and learn classroom setting. The course is presented in PowerPoint.

Cost to Participants

The course is sponsored by the manufacturer and is therefore offered to designers at no cost.
