Program Summary Handout

Provider: C.H.I. Overhead Doors

Provider #: 40107783

Course Title: Solutions in the Design Process Utilizing Security Grilles

AIA Course #: CHIAIA003SG

Length: 1 hour

Credit Designation: 1 AIA LU|HSW Hour

Description

This course will examine the use of Security Grille Doors in the design process. Participants will learn about the main operation choices, mounting, layout and aesthetic design options and which of these are best suited to achieve desired project goals including safety, visual access, air circulation and aesthetics.

Learning Objectives

By completing this course the design professional will be able to:

1. Participants will be able to define typical applications for grille doors to achieve project goals including visibility, airflow and security.
2. Participants will be able to recognize the main operation choices for grille doors and how to choose the correct product when specifying a job.
3. Participants will understand the various available mounting options and will be able to describe the layout options for side folding doors and learn how they can influence or complement the overall building design and integrity of your project.
4. Participants will gain an understanding of curtain and panel material choices and how they work to achieve continuity in your design.

Method of Delivery

The course is offered to design professionals in a Live Online setting via Microsoft Teams.

The course is presented in PowerPoint.

Cost to Participants

The course is sponsored by the manufacturer and is therefore offered to designers at no cost.
