 New Construction

Summary

Beer lovers rejoice as BrewDog's DogHouse opened the world's first beer themed restaurant, brewery and hotel complex outside of Columbus, Ohio. The DogHouse offers unique views of the brewing process, a beery assortment of spa treatments, shower fridges stocked with BrewDog brew and an education on brewing. Fury dog companions are encouraged to come and enjoy the venue with their owners..

Challenges

BrewDog, a Scotland-based beer maker, wanted this world class experience to be unique and impressive. It was important that the exterior architecture present a modern, fun design while embracing the transparent nature and inclusiveness of the DogHouse's theme.

How the Product Helped

Full-View glass garage doors running along the courtyard side of the facility incorporate the beautiful, modern lines that match the glass within the rest of the facility. They also provide maximum functionality to allow for reshuffling of the venue and easy access to the brewery.

Additional Insights

- The Midwest location of this unique venue means that during the winter, the doors provide a critical barrier for the heated space. But on warm days, the doors can be opened to create a seamless inclusive party inside and out.
- This installation required some unique customization of the spring layout and commercial track layouts. C.H.I. Customer Service & Engineering department were able to provide detailed layout schematics to ensure a seamless install.

Let C.H.I. help you with your next building project.
