 New Construction

### Summary

Doors are the life of the party at Door4 Brewing in Decatur, Illinois. Doors4 was founded with the purpose of providing high quality beverages and more. According to Doors4 website, “Our approach is to foster creativity, fun, and excitement around craft beer. We will always look to find ways to improve on what we are doing to make our brewery a destination and our products the choice of knowledgeable beer fans everywhere.”

### How the Product Helped

The logo sectional door provided a unique and functional branding opportunity while the full-view door in an interior application helped to define and secure space while not impeding views of the brewery.

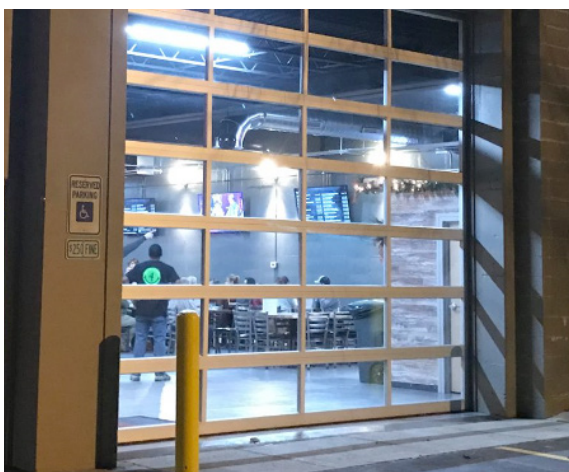

## Door4 Brewing – Where “doors” take center stage

### Additional Insights

- The logo door provides a perfect backdrop for many photo ops that are shared via social media, reinforcing the Door4 brand
- With this exclusive option of a logo door, the C.H.I. dealer was able to provide doors for the entire project which included two 3295 Full-View Aluminum garage doors.

“Not sure if any of us has been so excited to see a cooler door installed before! What better way to brand our business to our patrons and it makes for a great backdrop in photos posted on social media outlets. Easily one of the best purchases we’ve made for our business!”

Jimmy, GM - Door 4 Brewing Co.
