

PASS DOORS

A pass door is an entry door that is built into the garage door, allowing for entry and exit without having to open the garage door.

Note: Doors are not ADA or egress compliant. Minimum of 15" of headroom is required.

WICKET DOORS

A wicket door is an entry door permanently mounted next to a garage door in the same opening. The whole assembly can then swing up open, allowing the entire width of the opening to be utilized.

Note: Doors are not ADA or egress compliant. Minimum of 24" of headroom is required.

SWING-UP SECTIONAL POST

For openings that are too large for a single overhead door, the swing-up sectional post allows for two different sized garage doors to fill the space of one large opening. One door opens for normal entry access and both doors can be opened for maximum width.

CUSTOM TRACK DESIGN

If you are in need of a custom track design solution, our engineering team can create one to fit your specific needs.

LOGOS

We can print your company's logo on the inside or the outside of your garage door—a creative way to save money on signage and advertise your business.
